# METHODOLOGY

ZIP CODES COVERED:
07306 & 07307

Data in this report is derived directly from the Hudson County MLS. Sales that occurred in any given Quarter may have accepted an offer in a previous Quarter. Sold data is a lagging indicator but provides an overview of market progression. New listings provide a current view of the market, but the price data cannot be considered until the property is sold. Quarterly data may not reflect drastic changes. Any major market shifts, especially those that occur in the second half of the Quarter, would be reflected in the following Quarter. All data is subject to the inventory available within a given Quarter and may not always be an accurate representation of the short-term trend. Criteria such as Single-Family Homes typically have few Quarterly sales, which will skew the data. Every property is unique and requires a specialized market analysis to identify fair value and trends.
